Requirement Specifications for To-Do List Application

TITLE	USER STORY	ACCEPTANCE CRITERIA	
1) Task Creation	***As a*** *user,* ***I want to*** *add a new task with details (description, due date, status, priority),* ***so that*** *I can track my pending work.*	**1.1**	Backend API (`POST /api/tasks`) validates and stores tasks in an H2 database
		1.2	Frontend form includes fields for description (required), due date (optional), status (default: "open"), and priority (default: "Medium")
2) Task Management	***As a*** *user,* ***I want to*** *view, edit, delete or duplicate a task by clicking on it,* ***so that*** *I can update or remove tasks as needed.*	**2.1**	Clicking a task opens a details panel
		2.2	Edit: Backend API (`PUT /api/tasks/{id}`) updates the task data
		2.3	Delete: Backend API (`DELETE /api/tasks/{id}`) removes the task
		2.4	Duplicate: Backend API (`POST /api/tasks/{id}/duplicate`) creates a copy with "_copy" appended to the description
		2.5	Via "Back" Button, the details panel gets closed
3) Task Visibility & Filtering *extra functionality	***As a*** *user,* ***I want to*** *hide completed tasks from the main list and see a counter for "Done" tasks,* ***so that*** *I can focus on pending work while tracking completion progress.*	**3.1***	Main list only shows tasks with status "Open" or "In Progress"
		3.2*	Counter displays the total number of "Done" tasks
		3.3*	Clicking the counter shows a separate page of completed tasks
		3.4*	Toggle between "Open Tasks" and "Completed Tasks" via a Button
4) Task Attributes	***As a*** *user,* ***I want to*** *assign due dates, priority and statuses to tasks,* ***so that I*** *can organize my workload effectively.*	**3.1**	Status: Dropdown with "Open", "In Progress", "Done"
		3.2	Priority: Dropdown with "High", "Medium", "Low"
		3.3	Due Date: Calendar picker with optional time
